Installing Plaque**	$100	Installing Plaque**	$100

*Maximum height for an upright headstone: 3’
**No cost is incurred if the plaque is installed by the company creating the plaque

Families and friends purchasing a headstone are asked to follow these guidelines:

1. Begin communicating with our office *before* you order your stone, to ensure
   >purchaser has the appropriate authorizations to place a marker on the intended grave
   >the intended grave has space for a marker.

2. After you have ordered your stone, contact our office to arrange to pay for the foundation cement work. Costs are determined - $24.00 x Length of the foundation base.

3. Cemetery staff will install flat headstones but *not* upright headstones *(those are installed by the company creating the stone)*.

4. Flower vases can be bought from our cemetery or a vendor, but most match this size limit: 6” x 8”
Only one or two in-ground vases are allowed per grave.

5. Foundation cement work is completed in order of payment received. You are advised to continue to communicate with our office after your stone is ordered to pay for the cement work and be placed in the queue. *Please note: if your stone is completed and you haven’t paid for the cement work, your stone will have to be stored by the company until the cement work is completed.*

6. If you are adding a headstone to a grave that already has a headstone, size limitations still apply.

7. Purchasers must be the owner of the burial rights for the intended grave or have the permission of the owner to have the headstone installed.
